

Role Title: Software Tester

About PhixFlow Ltd

At PhixFlow, our mission is to enable anyone to create business applications by removing the barriers to development through our unique combination of experience, innovation, and intuitive Low-Code platform. We believe software development should be easy and enjoyable, challenging traditional methods, allowing anyone to create business-grade applications that improve processes and drive value.

Our platform has been used to create powerful applications for companies such as Tesco, Virgin Media, Lloyds Pharmacy, The Post Office and Jaguar Land Rover, to name just a few.

The role

We're looking for an experienced Software Tester to join Team PhixFlow, based at our headquarters in Cambridge, UK. As a member of the development team, you will be joining a great team who believe in changing the way modern software is created.

Responsibilities will include:

- Maintaining a high level of product expertise to support identification of required tests and in-depth cost/benefit analysis of testing efforts
- Identify gaps, and propose improvements, in current test coverage and processes to increase efficiency and enhance test maturity
- Establish and maintain test environments for continuous build, integration and testing pipelines that can support both functional and non-functional testing
- Hands on development of automated tests for both client side (React, JavaScript) and server side (Spring, Java, Hibernate) software
- Planning, documenting and running manual tests as required
- Working with the support teams to replicate and help provide workarounds for reported bugs

The candidate

The successful candidate will have:

- A minimum of a 2:1 degree in computing, maths or scientific subject from a Russell-group or equivalent university
- A minimum of 3 years experience of a software tester of a highly configurable client/server application in an agile development environment.
- An understanding of and experience with CD/CI pipeline tools and methodologies

- Excellent understand of automated testing software, technologies and processes
- Advanced knowledge of building and executing automated tests
- Experience of web-based applications and API Testing
- Excellent knowledge of methods and techniques used to identify test scenarios and criteria.
- An ISTQB qualification (desirable but not mandatory)

What you can expect from PhixFlow

- A caring company that provides a flexible and safe working environment
- An opportunity to shape the future of software development
- A fast-growing, ambitious company with opportunities for you to grow

To apply for this position please email you CV and a covering letter to enquiries@phixflow.com
